

EKOVILLA Feed- Through Seal

PRODUCT DESCRIPTION

The Ekovilla X feed- through seal is intended especially for sealing the feed-throughs of ventilation pipes, central vacuum cleaner pipes and electric pipes. The feed-through element has a self-adhesive flange. Thanks to its size the flange part seals even the largest perforations and cuts you need to make for installing ventilation pipes etc.

TECHNICAL DETAILS

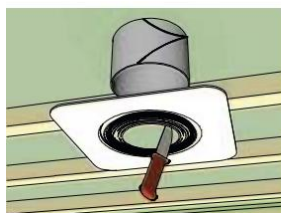

Material	Polyethylene plastic made from recycled material
Flange section size	295x295mm, 5pcs./ PU
Adhesive	VOC-free: class A+, solvent- free, plasticizer- free
Suitable for pipes	5-160mm
Installation temperature >	+5 °C
Packaging unit	Carton, 80pcs./ box*, 20kg/ box

*Dimensions 40x60x40cm

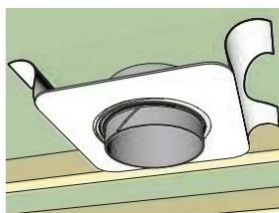

PROPERTIES

The flexible flange collar can be tightly fitted around the pipe, ensuring a reliable seal. The Ekovilla X feed- through can be installed quickly and easily.

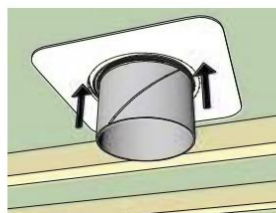

INSTALLATION

Cut a hole slightly smaller than the pipe diameter.

Clean around the pipe and remove the back papers.

Press the feed-through seal firmly into place

Ensure airtightness of edges and pipe by using Ekovilla X sealing tape
