

EKOVILLA X NAIL SEAL TAPE

PRODUCT INFORMATION

Ekovilla X Nail Seal Tape is a single-sided tape made of closed cell polyethylene foam and coated with acrylic dispersion adhesive.

Designated for use as a sealing tape in roof and construction works. Its elastic structure allows alignment of the counter-batten installed on the roof membrane.

APPLICATIONS

Ekovilla X Nail seal tape is designed for sealing and insulating in roof works as well as general construction. Recommended for sealing installation punctures in roof membranes and foils. When applied below the counter-batten, the tape allows to align the uneven spots.

Thanks to this application, all penetration points of the roof membrane through roofing staples and nails are sealed, which eliminates the risk of water and moisture penetration on rafters and into the thermal insulation.

Application temperature range is from +5 °C to +40 °C.

ADVANTAGES

- **UV-resistant**
- **Waterproof**
